Subject: Microsoft case comments

U.S. Department of Justice

Gentlemen/Ladies:

Refer: Microsoft case.

I understand the DOJ is taking comments about the Microsoft Case.

Microsoft was clearly a case of monopolistic behavior. The company should have been split into four separate operating units.

1. Operating Systems.
2. Internet related software.
3. All other software.
4. All other business activities.

Why this wasn't done is a mystery to me.
